Description

The VERVE Runner - Curved Treadmill The VERVE Runner is a completely self-powered, manual treadmill that requires no electricity. Feel free to run at unlimited speed or simply walk on the unique curved running surface where you provide the power. The VERVE Runner is a completely self-powered, manual treadmill that requires no electricity. Feel free to run at unlimited speed or simply walk on the unique curved running surface where you provide the power. Your time is your most valuable asset. Burn up to 30% more calories in the same amount of time compared to a traditional electrical powered treadmill. This heavy duty commercial treadmill weighs 147kg and is built to last.
